May be used with the following interactive: Photosynthesis

1. Choose one of the following Questions:
   - □ How do plants use sunlight?
   - □ Why do plants need to undergo photosynthesis?
   - □ What are the essential components needed for a plant to perform photosynthesis?
   - □ What are the products of photosynthesis in plants?

2. Claim: State your claim in response to the selected question.

3. Evidence: Provide specific pieces of evidence to support your claim.

4. Reasoning: Explain logically how the evidence supports the claim, linking scientific principles or concepts to the claim and evidence.
